DETAILED ACTION

1. This Office action is in response to Applicant's amendment, filed on 02/08/2005.

2. Claim is pending.

Response to Amendment

3. The reply filed on 02/08/2005 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): Applicant fails to response to the last office action mailed on 11/08/2004. In that office action, Applicant is required to argue the prior art of record (Nel (U.S. Pat. No. 6,507,823) in view of Mellen et al (U.S. pat. No. 6,384,709). See., BELOW FOR PREVIOUS OFFICE ACTION mailed on 11/08/2005.

See 37 CFR 1.111. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

Specification

4. The abstract of the specification is objected to because of the following informalities. Applicant is advised to provide a new abstract. Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 1 rejected under 35 U.S.C. 112 second paragraph because claim recites a “means of storing funds”. A method claim is not required to have a “means plus function.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 1 is rejected under 35 U.S.C. 103 (a) as being unpatentable over Nel (U.S. Pat. No. 6,507,823)in view of Mellen et al (U.S. pat. No. 6,384,709).

As per claim 1, Nel substantially discloses a method/system of conducting a financial transaction between a purchaser and a vendor of a product. The method/system preferably includes any one or more of steps of verifying the availability of funds in the account (which is readable as Applicant's claimed invention wherein it is stated that a method of providing funds with attributes that are validated), comprising:

a point of sale method that accepts instruments of value and attributes such as geographical location and age are validated and verified (see., abstract, col 2, lines 12-14, specifically wherein it is stated that an access code to verify authorization of the

transaction, col 6, lines 9-20, col 7, lines 52-64). Nel further discloses attribute such as age see., col 9, lines 36-47, specifically wherein said selection valid procedure may include other check procedures which, for example, may prohibit a purchaser from performing a certain transaction if he or she is below a certain age; a means of storing funds in an electronic accessible form (see., col 3, lines 9-31, col 7, lines 52-64); an instrument that contains information to facilitate access to said funds (see., col 2, lines 12-14, lines 39-43, col 3, lines 9-50).

1. However, it is to be noted that Nel fails to explicitly disclose attribute such as geographical location is validated and verified. Mellen discloses an access control system which compares the geographic location information in a key with real time geographic location information from a geographic location detection unit associated with a mobile container (see., abstract, col 1, lines 30-42. Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the financial transactions of Nel by including the limitation detailed above as taught by Mellen because this would verify unauthorized access based on the users location.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

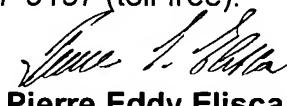

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
